

05/10/2017

Dear FCC:

Our livelihood depends on customers being able to use VoIP service over standard Internet services. If you allow Comcast, Verizon, ATT, T-Mobile, Time Warner or other ISP services to set preferences for certain ports, providers or services for profit, we may see our business go away with great speed. We may go out of business very quickly, as our customers may not be able to afford these extra costs.

Please support Net-Neutrality and classify the ISP services as Title 2, with proper regulation to prevent them from favoring certain types of traffic for favorable treatment (and others with less favorable treatment).

Thank you!!!

Michael LeBlanc
